

ASAM 2023 Workshop: Integrating OUD Treatment into Post-Acute Care

Breakout Session Guide

- Please introduce yourself and practice setting to those at your table.

Questions for Discussion:

- What are you currently doing in your practice setting?
 - o If hospital, are you initiating methadone and buprenorphine? What do you do on discharge to post-acute care settings?
 - o If SNF, are you working with local hospitals and SUD treatment programs (including OTPs)
 - o If OTP, what do you do when your patients are admitted to hospital and SNF? What does methadone provision look like?
- What is the role of peer recovery coaches in your setting? If using peers, how could you expand their role?
- What are the challenges you're experiencing for transitions of care for patients with OUD?
- What successes are you already seeing?
- Are you familiar with your state opioid treatment authority (SOTA) and regional DEA representatives?
- How do stigma and discrimination play a role?
- What are steps you can take to partner in your practice setting/institution to increase access to MOUD (and SUD treatment in general) in post-acute care settings?
